

# Accelerating manufacturing growth in India!

From small beginnings in 1969, IMTEX has grown exponentially over a timeframe of 50 years bringing the most advanced manufacturing technologies from across the globe under one roof.

## Highlights of IMTEX 2019

- Around 80,000 sq m of exhibition space
- Six Exhibition Halls
- Seven Country-group participation
- Over 20 overseas countries participation
- International Seminar on Machining Technologies focusing on advancements in machining technologies will be held on 23rd January 2019.
- i2 Academia Pavilion which will connect institutions with industry.
- Connect which will join companies with students on a common platform to source talent for machine tool industry.
- Jagruti which will connect students from various cities with institutions.
- A Buyer-Seller meet will also be organized which will give a platform for companies to sell machines and explore mutual business opportunities.

Since its conceptualization IMTEX has played an enabling role for manufacturing growth in India. From small beginnings in 1969 the show has grown exponentially over a timeframe of 50 years bringing the most advanced manufacturing technologies from across the globe under one roof. This has benefitted Indian manufacturers immensely. IMTEX is today recognized as a “must attend” show for manufacturing and technology enthusiasts.

A unique feature of IMTEX has been the presence of large buyer delegations from public and private sectors and key decision makers from various industries who have supported the growth of exhibition from the very beginning and is a must attend exhibition to some manufacturing solutions across industry sectors. The success of the show can be gauged from the number of footfalls that we are seeing in every show and a must attend exhibition to some manufacturing solutions across industry sectors. Visitors to IMTEX represent the
